

PREM KUMAR BODAKUNTA

Java Backend Developer | Spring Boot | Microservices | AWS

premkumarbodakunta.tech@gmail.com | +91 8639928534 | www.linkedin.com/in/prem-kumar-bodakunta | github.io

PROFESSIONAL SUMMARY

Java Backend Developer with 4 years of experience designing and delivering scalable, cloud-native microservices across fintech and enterprise domains. Proficient in Java 8/17, Spring Boot, Hibernate, JPA, REST APIs, and AWS — with hands-on expertise in event-driven architecture (Kafka), multithreading, design patterns, system design, Redis caching, and authentication systems (OIDC, OAuth2, SSO). AWS Certified Developer with a strong track record of modernizing legacy systems, improving API performance, and driving high-quality software through TDD and automation. Pursuing high-impact product engineering roles at technology-first companies.

TECHNICAL SKILLS

Languages: Java 8, Java 17 (Streams, Lambdas, Records), JavaScript, TypeScript, HTML, CSS, SQL

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Cloud, Hibernate, JPA

Architecture: Microservices, REST APIs, Event-Driven Architecture (Kafka), System Design, Design Patterns, SOAP

Concurrency: Multithreading, Java Concurrency (Executor Service, Completable Future, ForkJoinPool), Reactive Programming

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, SQS, SNS), Docker, Kubernetes, Jenkins, ArgoCD, Red Hat OpenShift, Terraform, CI/CD

Databases: MySQL, PostgreSQL, MongoDB, Redis (Caching & Pub/Sub)

Messaging: Apache Kafka (Producers, Consumers, Topics, Partitions, Consumer Groups)

Security: OAuth2, OpenID Connect (OIDC), OKTA, SSO, Spring Security

Testing: JUnit, Mockito, Karate, Selenium, JMeter, Postman, Cucumber, TDD

Tools & Practices: Git, GitHub, Maven, Gradle, Agile/Scrum, Splunk, IntelliJ IDEA

PROFESSIONAL EXPERIENCE

Data Labs India Solutions PVT LTD, India | Software Engineer--Java Developer

Feb 2023 – Present

- Modernized 20+ legacy Java applications to Java 17, adopting modern language features (Streams, Lambdas, Records) and applying SOLID principles and Design Patterns (Factory, Builder, Strategy) to reduce technical debt.
- Developed and optimized RESTful and SOAP APIs with Spring Boot, Hibernate, and JPA, reducing average API response time by 35% and ensuring reliable data retrieval for credit assessments.
- Introduced Apache Kafka for asynchronous event-driven communication between services, decoupling producers and consumers and improving system resilience under high-load scenarios.
- Increased backend throughput by 40% through connection pooling optimization and multithreading improvements using Java Concurrency utilities (ExecutorService, Completable Future).
- Led migration of services from Pivotal Cloud Foundry to AWS ROSA, reducing infrastructure costs by 25% and improving horizontal scalability.
- Migrated authentication from Basic Auth to OpenID Connect (OIDC) and integrated OKTA for identity management, implementing SSO to unify access across 10+ applications.
- Managed application pods using ArgoCD and Red Hat OpenShift, ensuring zero-downtime production deployments and rapid incident resolution.
- Built a comprehensive automated testing suite with JUnit, Mockito, and Karate, achieving 85%+ test coverage and reducing bug detection time by 50%.
- Monitored production and test environments using Splunk for log analysis, proactively identifying and resolving service anomalies.
- Leveraged AWS EC2 and S3 for CI/CD infrastructure, Jenkins setup, and scalable asset/configuration management.

- Built backend microservices in Java 8 and Spring Boot, leveraging Streams and Lambda expressions for efficient data processing and aggregation across high-throughput batch and real-time workloads.
- Implemented event-driven processing using Kafka producers and consumers, enabling reliable async communication between microservices and eliminating tight service coupling.
- Applied multithreading and Java Concurrency (ExecutorService, Completable Future) for asynchronous processing, improving overall throughput by 30%.
- Integrated microservices with PostgreSQL and MySQL, applying indexing, query optimization, and connection pooling strategies that reduced query latency by 40%.
- Containerized applications using Docker and deployed on Kubernetes with Helm charts; built GitLab CI/CD pipelines for automated Maven builds and deployments.
- Applied Design Patterns (Repository, Factory, Decorator) to ensure clean, testable, and maintainable service layers.
- Reduced infrastructure costs by 20% through efficient load distribution and Kubernetes autoscaling configurations.

PERSONAL PROJECT

Project Vihan – Coffee Shop Management System

Tech Stack: Java 17, Spring Boot, Spring Data JPA, MySQL, REST APIs, HTML, CSS, JavaScript, Postman, Git

Developed a full-stack Coffee Shop Management System that enables digital management of coffee products through a responsive web interface and RESTful backend services.

Key Responsibilities & Features:

- Designed and developed a Spring Boot backend using a layered architecture (Controller, Service, Repository, Entity).
- Built CRUD REST APIs to create, retrieve, update, and delete coffee items with proper HTTP methods and JSON responses. Integrated the frontend with backend APIs using JavaScript Fetch API for real-time data operations without page reloads.
- Designed the MySQL database schema and managed persistence using Spring Data JPA and Hibernate.
- Implemented product attributes including coffee name, category, price, and availability with server-side validation.
- Tested and validated all endpoints using Postman, ensuring reliable API functionality and proper error handling.
- Managed source code with Git & GitHub and followed clean, modular coding practices for maintainability.

EDUCATION

Bachelor of Commerce — Computer Applications I *Osmania University, Hyderabad, India* 2019 – 2022

CERTIFICATIONS & TRAINING

- AWS Certified Developer — Associate
- Java Full Stack Web Application Development — 9-Month Internship, Syntrino Pvt. Ltd. | Apr 2022 -Dec 2022
- Conversational German Program — Beginner & Elementary Levels, Y-Axis

LANGUAGES

English: Professional Working Proficiency

German: German: Currently learning — B1 level
